# Arpit Bindal

Product engineering · Full-stack systems · Web3 · Applied AI

contact@arpitbindal.com · arpitbindal.com
linkedin.com/in/arpitbindal · github.com/arpitbindal

My work connects interface design, full-stack systems, Web3, and applied AI.

## Professional experience

### Freelance and personal AI work

Freelance and personal · From August 2026

My current work includes automation, RAG agents, LoRA models, voice systems, and MCP services.

### Full-Stack Developer / Web3 Integration Specialist

Lighthouse / ETERNAL LLC · April 2023 – 15 August 2026

My role expanded into full-stack development and Web3 integration.

### Lead Frontend Developer

Lighthouse / ETERNAL LLC · 14 March 2022 – April 2023

I joined Lighthouse as a founding team member and owned frontend systems across products and internal tools.

### Full Stack Developer / Team Lead

SMDEVOPS LLP · January 2020 – approximately December 2021

I built client products and led delivery work at SMDEVOPS.

## Selected work at Lighthouse

### Lighthouse

I owned the frontend across Lighthouse products and internal tools.

I integrated wallets and smart contracts.

Wallet integrations include MetaMask, Web3Auth, Coreum, Slush, Keplr, Cosmostation, and Radix integrations.

### BackupData

I planned and built a backup service for databases and S3 data.

My work covered infrastructure, backend services, SDKs, and a CLI.

Users needed automated backups across databases and external storage services, including AWS S3 and Azure storage.

I created source-specific backup flows for SQL databases, PostgreSQL, AWS DynamoDB, S3 data, and other sources.

I provided the custom backup tooling through Node.js, Go, and Python SDKs.

### 1MB

I built 1MB and its Chrome extension independently.

The product connects data collection, tokenization, and rewards for online activity.

### Turby

I designed the Turby mascot and automated the collection generation.

I also handled launch work and supervised the mint.

### Agent memory

At Lighthouse, I worked on memory and context sharing between AI agents as an extension of BackupData.

## Freelance and applied AI

### Bhaktibaazar

Bhaktibaazar is India's first devotional and spiritual marketplace. I build its AI-first features: MCP connections that generate blogs automatically, and a custom RAG pipeline behind its chatbots and voice agents.

## Client products at SMDEVOPS

Netbookflix · Fairpay · Xhuma Clinic Management · People Accel · Nexus Mall · Harmony Insurance ERP

## Public contributions

### ETHIndia 2023, Bangalore

Hackathon mentor · I mentored participants at ETHIndia 2023 in Bangalore.

### FIL Bangkok 2024

Company representative · I represented Lighthouse at FIL Bangkok 2024.

### ETHGlobal 2025, New Delhi

Workshop speaker and hackathon judge · I spoke at a Filecoin India workshop and judged the hackathon at ETHGlobal 2025 in New Delhi.

## Education

### B.Tech in Computer Science and Engineering

BML Munjal University · 2015 – 2019

The university put my final-year project forward for a patent as "Method for Processing Image Captured Through Camera", a face recognition method for surveillance cameras. The 2019 patent search report found novel features and recommended that the inventors proceed.

### Senior secondary education

Delhi Public School, Jammu · 2013 – 2015
